George and The Secret World Inside Earth

BOOK 1 BONUSPAGE

☀️ WHERE THIS STORY CAME FROM ☀️

(A super-cool true-ish page for curious kids!)

The idea of a ****world inside Earth**** has been around for hundreds of years!

- ✓ Ancient Greek myths talked about “Hollow Earth” caves leading to magical lands.
- ✓ In 1692, scientist Edmond Halley (yes, the comet guy!) said Earth might have giant hollow spheres inside.
- ✓ Navy hero Admiral Byrd flew over the North Pole in 1947 and reported seeing green valleys... inside the ice?!
- ✓ Real crystals (like quartz) actually glow when you squeeze them — it’s called piezo-luminescence!

Try this at home:

- 1. Find a clear quartz crystal (or even a glass marble).**
- 2. Rub it hard in a dark room.**
- 3. Watch for tiny sparks of light — just like George's Crystal Sun!**

Keep exploring — the real world is FULL of magic!

Love,

George, Max, and Family Adventure Press
